MEMORANDUM FOR: D/DCI/IC

SUBJECT : Community Issues Identified During CIA's
FY 1974/75 Program Review

1. A memorandum which O/PPB is preparing for Mr. Colby identifies five Community issues for which the IC Staff has primary action responsibility. The following is a brief status report on them:

a. Community Training Programs and Facilities.

[redacted] have been assigned to this subject and have begun to assemble material. A terms of reference will be developed. OPPB/CIA is being kept informed and involved where CIA is concerned. Matter should be brought up at IRAC Working Group and possibly should be cited at USIB as well.

b. Communications Training Facilities. (A search for alternatives to eliminate the housing problem at [redacted]) This is obviously closely related to a. above and will be addressed in that context. Not much likelihood that Commo training will change locations but conceivable scheduling can be adjusted.

c. The Appropriate Mix of DIA and CIA Personnel in Imagery Processing. This issue is subordinate to the much larger issue of how much and what kind of imagery will the intelligence consumer expect. No action has been taken yet. I do plan that [redacted] will make some initial inquiries concerning DIA's study of some months ago and NPIC's own deliberations with OPPB/CIA.

e. The Apportionment of Net Assessment Responsibilities around the Community. Action on this issue must be determined by D/DCI/IC.

2. A paragraph of the PPB memorandum also proposes that the IC Staff monitor a DDS&T examination of OEL's growth rate. We recently discussed with Jim Hirsch, the Director of OEL, his interest in re-defining OEL's charter. He is preparing a study on the question, and we will keep in touch with him on it.
